WORK EXPERIENCE

Zeek Interactive Inc. - Software Engineer

May 2024 - September 2024

- Developed and maintained **Laravel and FilamentPHP** applications, improving client efficiency.
- Designed and integrated **dynamic FilamentPHP dashboards**, enhancing user experience for **over 200+ users**.
- Built and customized **WordPress themes and plugins** to meet client specifications, ensuring compatibility and responsiveness across devices.
- Collaborated with a team of engineers to deliver **scalable** software solutions, **reducing backend load times**.
- Refactored **legacy codebases**, cutting technical debt and boosting maintainability.
- Created and optimized backend services for **high-traffic applications**, supporting **thousands of daily requests**.
- Built and deployed **RESTful APIs**, enabling seamless integrations with third-party services.

Zeek Interactive Inc. - QA Engineer

May 2023 - September 2023

- Conducted **automated and manual testing**, reducing production bugs.
 - Led **cross-browser compatibility testing**, ensuring validity across multiple platforms.
 - Debugged and verified **new feature releases**, improving overall software stability.
 - Identified and documented **critical bugs**, collaborating with developers to implement fixes.
 - Partnered with developers to **triage and resolve** high-priority production issues.
-

PROJECTS

Lavender - Shift Work Sleep Management App

- **Project Manager** leading a team of **five developers**, overseeing development cycles and timelines.
- Integrated **Google Firebase services** (Authentication, Firestore, Cloud Functions) with a **React frontend**, automating sleep scheduling for shift workers.
- Partnered with a **sleep psychology expert** to ensure scheduling recommendations align with research-backed methodologies.

Work Projects - Internal Dashboard & EHR Software

- Developed **FilamentPHP-powered** internal dashboards, enabling partners to track project statuses in real-time.
- Built an **Electronic Health Records (EHR) application** for a major medical technology company, streamlining patient data management and increasing efficiency.

Portfolio Website - React/Next.js App

- Designed and developed a portfolio website using Next.js, optimized for UI/UX with a focus on clean, responsive design.
-

EDUCATION

Oregon State University

September 2021 - June 2025

- Bachelor of Science in **Computer Science**
 - GPA: 3.90
 - Concentration: **Web and Mobile Application Development**
-
